Re: application for an engineering internship

Dear Madam/Sir,

I am currently in my second year of engineering studies, the fourth year of my five-year degree program. I am looking for a 4-month internship starting in April 2022. Your structure seems to meet my expectations, so I would like to send you my application.

During my education, I specialized in engineering with the aim of being polyvalent and this, to be able to evolve in the field that will please me. Since 2021, I do internships every year to expand my professional experience. In order to discover a maximum of different jobs, I have done internships in companies in various fields. Indeed, I have been a researcher, a salesman and a project manager during the different internships I have done these last 2 years. These experiences, although different, are grouped around teamwork, an essential value in the world of work in my opinion.

Today, I think that completing my training by doing an internship in your company, at the heart of innovation, would allow me to take advantage of the skills I have acquired over the years.

I hope that my application has caught your attention and that I will have the chance to defend my career plan and my motivations in more detail during an upcoming interview.

I look forward to hearing from you. Please accept, Madam, Sir, my sincere regards.
